

Glass Tempering Furnaces

产品名称	Glass Tempering Furnaces
公司名称	洛阳市恒凯科技有限公司
价格	.00/普通
规格参数	
公司地址	洛阳市西工区中泰商务大厦1101
联系电话	0379-60692575 13629808125

产品详情

Basic Info. Model NO.: SZ-GHL Control System: PLC Certification: CE Type: Glass Tempering Furnaces Export Markets: Global Product Description 1. Professional for processing super thin glass with high flatness 2. Simple and convenient operation 3. Low production cost and 4. Small investment for equipment SZ-HGL Coating Chemical Furnace is professional for tempering thin glass with perfect flatness. I. Chemical toughened glass As some special glass can not be physically toughened, such as thin glass thickness less than 2mm, Hyperboloid bent glass for express train, big bus, etc, or strict flatness requirement for glass, for example special glass for copier, these special glass must be chemically toughened. The the theory of chemical toughening, At a certain temperature, make the bigger metallic ions(such as K ions) exchange the smaller Na ions in the glass surface, the stress will be formed on the glass surface when glass cools down, thereby the strength of glass is increased.
