产品详情

SD-RW-SC/PC-5G-315-3P-BXTP

Features:High linearity InGaAs PD photodiode ideally for analog O/E conversion applicationLow capacitance, low return loss,low dark current,low inter-modulation distortionCoaxial package (3pin)Single model or multi-mode fiber is optional,and can be produced with a variety of industrystandard connector or without a connector. They are also available with horizontal type flangepackage

Application:Mobile communication systemsCATV transmission systemsOther analog transmission applications
