

双轴太阳能跟踪系统 太阳能控制器

产品名称	双轴太阳能跟踪系统 太阳能控制器
公司名称	常州润源电子科技有限公司
价格	.00/个
规格参数	名称:双轴太阳能跟踪系统 产品用途:追踪太阳能,提高电池板发电量
公司地址	天宁区中吴大道1219号
联系电话	86-051986711519 18915019608

产品详情

名称 双轴太阳能跟踪系统 产品用途 追踪太阳能,提高电池板发电量

detailed product description

1. two axis full automatic tracking2. tracking accuracy ,1.03. small volume, convenient installation

place of origin: jiangsu china (mainland)brand name:runyuna load power (w): led 30 w specification: normal
application: home solar power (w): 110w output voltage (v): dc22v work time (h):6~8 hours model number: ry-sl-
bbrand name:runyuan automatic tracking mode: biaxial automatic the weight of the entire system: 20kg tracking
principle:active tracking precision: 0.5 ° -1 ° power generation volume: 40%

device models, technical parameters

ry-sl-b small-scale tracking system technical parameters

model	ry-sl-b-1
specifications	
automatic tracking mode	biaxial automatic
solar cell type	reference dimensions 1494mm x678mm x45mm power110wp
wind system works(m/s)	28.4
the weight of the entire system (excluding solar cell)(kg)	20
range of vertical angle (angle of elevation)	0-90 °
horizontal angle range (azimuth)	0~355 °
tracking principle	active
tracking precision	0.5 °
the annual average power generation volume	45%

the system average power consumption(w)	0.5
protection	wind, automatic protection (can add)
system function	automatic tracking, automatic reset, automatic protection, verify, manual control, (data acquisition: total recharge and discharge ann hours ,can add)

statement:1 system components: the sun sensors, motor drive controller, mechanical actuators2 don't include: pole, mounting bracket, wind speed sensor3 can provide the design drawing according to customers" requirements4 drawing formats: dwg, pdf, jpg
