Highlights Seven Article Innovation Park is located in the core ancient capital style protection area of Dongcheng District, creating a "hidden and hidden" office space for all office workers in the bustling city. The park fully ensures that you have a quiet and private office space in the form of a "single door and courtyard", and is equipped with a thoughtful independent parking lot, greatly meeting your commuting and daily travel needs. At the same time, the highlight utilized its rich resources in the design field and cleverly combined office space to create three aerial outdoor gardens. It allows you to be in the center of the capital, yet you can overlook the distance. In addition to the boredom of work, you can encounter a peaceful and stable atmosphere. Walking in this brilliant alley, I want to show you a place where there is life, struggle, poetry and distance. In the four storey office building, each floor is equipped with Casement window. The building is interspersed with three Roof garden in different directions, which is the closest place for urban people to go to poetry and distance. Open the window, feel the breeze blowing your face, and you can see the black brick and gray tile alleys and Siheyuan; Pushing open the door, standing in the garden overlooking the flock of pigeons gurgling past, immersing oneself in the vicissitudes of old Beijing, temporarily distancing oneself from the troubles of work and experiencing the natural air. At the highlight of Dongsì Qítiao, you can work in the building and enjoy art and design; You can take a walk outside the door, appreciate the culture of hutongs, and even climb high to overlook the poetry and distance you yearn for; You can discard haste and panic, and welcome your blooming with the most relaxed posture.
