标准编号 Standard/Code	标准名称 Standard Title
EN 1957	Furniture - Beds and mattresses - Test methods for the determination of functional characteristics and assessment criteria

This European standard specifies test methods for the determination of the durability and hardness of mattresses and all types of fully erected beds with mattresses (and mattress pads when they form a unit with the mattress). It does not apply to water beds, air beds and children cots. It includes a method for the determination of the firmness rating of a mattress or a bed correlating to the subjective assessment made by people (see Annex A). It must be emphasized that the firmness rating cannot be used to demonstrate comfort and/or quality of a mattress or a complete bed. Ageing and degradation caused by air, light, humidity and temperature is not included. The test results are only valid for the article tested. When test results are intended to be applied to other similar articles, the test specimen shall be representative of them.

该欧洲标准规定了测定床垫和所有类型的带床垫的完全直立床（以及与床垫形成一个整体的床垫垫）的耐用性和硬度的测试方法。不适用于水床、充气床和儿童床。它包括一种根据人们的主观评估确定床垫或床的硬度等级的方法（见附录 A）。必须强调的是，硬度等级不能用于证明床垫或整张床的舒适度和/或质量。不包括由空气、光线、湿度和温度引起的老化和降解。测试结果仅对所测试的物品有效。当测试结果适用于其他类似物品时，测试样本应具有代表性。
