产品详情

传热流体是一种特殊配方的高性能硅油。用于低温液相传热介质。它具有优异的低温传热和本泵送性和优良的热稳定性。特别适合低温零下 115度 is a synthetic heat transfer fluid that is used in a range of -115 ° C to 175 ° C. The maximum permissible film temperature is 210 ° C.Suitable applications: Single fluid process heating and cooling systems in the pharmaceutical and fine chemi- cal industries.
