产品详情

Moplen Z30S

Polypropylene Homopolymer

Shazand (Arak) Petrochemical Corporation

产品说明：

Moplen Z30S is a high melt flow homo-polymer polypropylene for the production of CF, BCF and staple fibres at medium to high spinning speeds. Moplen Z30S offers a high homogeneity, stable extrusion and excellent processability on both short and long spinning lines. This grade allows a high stretch ratio and gives tough and resilient fibres. Moplen Z30S is suitable for low denier staple fibres for non-woven fabrics, diapers, medical-sanitary applications and wipes. Another typical application is high tenacity continuous filament for straps for backpacks, handles for big and safety belts. Continuous filament with medium tenacity is used for upholstery, sportswear and heavy duty clothing. Moplen Z30S is also suited for the production of bulked continuous filament for thermo bonding and carpets.* Moplen Z30S is suitable for food contact.
