

油式模温机 厦门模具控温机

产品名称	油式模温机 厦门模具控温机
公司名称	厦门巨亿工贸有限公司
价格	.00/普通
规格参数	
公司地址	厦门湖里区嘉园路18号之6-601
联系电话	86-05925653000 18950115151

产品详情

产品介绍产品特点：1、可根据需要任意选择以水或热媒油当传热介质。water/oil dual purpose machine can use either water or oil heating medium.2、选购配备的pid智慧型自动演算的温度控制器，能准确显示和控制模具温度于所需要的温度 ± 1 内。optional pid temperature controllers are used for accurate control of temperature within

± 1 3、两段式加热结构设计，可视所需之温度增减电力，并配合特殊之发热构造，可省时省电。two step heating selector gives rapid temperature increase control when required thus saving time & power i.e. start up in mornings. 4、设想周到的各种电子保护装置，如无熔丝开关，缺水或缺油，温度异常及泵浦过负荷等自动警示系统，回路能自动切断，确保安全。safety device containing an audible alarm will break the circuit automatically when the pump is overloaded,temperature overheats or there is a shortage of oil or water.5、油温最高可达199度。the hottest temperature is

199 .性能参数产品特点：1、可根据需要任意选择以水或热媒油当传热介质。water/oil dual purpose machine can use either water or oil heating medium.2、选购配备的pid智慧型自动演算的温度控制器，能准确显示和控制模具温度于所需要的温度 ± 1 内。optional pid temperature controllers are used for accurate control of temperature within

± 1 3、两段式加热结构设计，可视所需之温度增减电力，并配合特殊之发热构造，可省时省电。two step heating selector gives rapid temperature increase control when required thus saving time & power i.e. start up in mornings. 4、设想周到的各种电子保护装置，如无熔丝开关，缺水或缺油，温度异常及泵浦过负荷等自动警示系统，回路能自动切断，确保安全。safety device containing an audible alarm will break the circuit automatically when the pump is overloaded,temperature overheats or there is a shortage of oil or water.5、油温最高可达199度。the hottest temperature is

199 .使用及维护产品特点：1、可根据需要任意选择以水或热媒油当传热介质。water/oil dual purpose machine can use either water or oil heating medium.2、选购配备的pid智慧型自动演算的温度控制器，能准确显示和控制模具温度于所需要的温度 ± 1 内。optional pid temperature controllers are used for accurate control of temperature within

± 1 3、两段式加热结构设计，可视所需之温度增减电力，并配合特殊之发热构造，可省时省电。two step heating selector gives rapid temperature increase control when required thus saving time & power i.e. start up in mornings. 4、设想周到的各种电子保护装置，如无熔丝开关，缺水或缺油，温度异常及泵浦过负荷等自动警示系统，回路能自动切断，确保安全。safety device containing an audible alarm will break the circuit automatically when the pump is overloaded,temperature overheats or there is a shortage of oil or

water.5、油温最高可达199度。the hottest temperature is 199 .其他说明 应用范围：1.塑胶,橡胶工业 plastic,rubber industry2.制鞋业 system shoe industry3.电镀工业 electroplate the industry4.电子制造业 electronics manufacturing industry5.化工制造业 chemical engineering manufacturing industry6.机械加工业 the machine process the industry交易说明含增值税票，出货前结清货款，厦门地区免费送货上门，其他地区发货运不含运费，到站客户自提。
