产品详情

1.unlike those common leather ipad cases, tilt case features an unconventional design. 2.as we can see from the image, 100% wool is used as the external cover instead of as the lining. 3.the vegetable tanned leather protects the screen of ipad as closed. 4.when it ' s opened, the natural curliness on the front cover makes the ipad case turn into a nice ipad stand for your ipad operation. 5.the four corner leather loops can firmly hold your precious ipad in place and keep all ipad buttons and port accessible. and the metal snaps ensure the ipad not to slip out of the case. 6.color:brown and grey。
