美国科慕/杜邦 ETFE HT-2185 耐化学 抗撞击 开关应用 注射成型件

产品名称	美国科慕/杜邦 ETFE HT-2185 耐化学 抗撞击 开关应用 注射成型件
公司名称	天津市星云新材料有限公司
价格	260.00/千克
规格参数	品牌:美国科慕/杜邦 包装:25KG/包 产地:美国科慕/杜邦
公司地址	天津市东丽区航双路与津滨快速路交口处东北侧航空商务中心2#-1,2-201(二层2057室)
联系电话	18622344552 18622344552

产品详情

美国科慕/杜邦 ETFE HT-2185 耐化学 抗撞击 开关应用 注射成型件

Generic Name: 乙烯四氟乙烯共聚物 (ETFE) - 提供方: The Chemours Company

Tefzel ETFE HT-2185 is a special purpose fluoroplastic resin available in translucent, 2.5-mm (0.1-in) pellets. Compared with other grades of Tefzel, it has a higher flow rate.Tefzel HT-2185 and the other Tefzel fluoropolymers are melt processible, modified copolymers of ethylene and tetrafluoroethylene. They are high-performance resins that can be processed at relatively high rates compared with fluorocarbon resins. They are mechanically tough and offer an excellent balance of properties.The relatively high flow rate of Tefzel HT-2185 makes it uniquely suitable for high-speed processing, especially for extruded coatings and injection molding of slender, thin-walled, or intricate shapes. Molded or extruded products made from Tefzel HT-2185 are preferred for uses that do not involve significant flexural or tensile stress at elevated temperatures. Higher viscosity products such as Tefzel HT-2181 and Tefzel HT-2183 are preferred for these applications.Properly processed products made from neat Tefzel HT-2185 are inert to most solvents and chemicals, hydrolytically stable, and weather-resistant. The recommended upper service temperature is 150 ° C (302 ° F); useful properties are retained at cryogenic ranges. The level and stability of dielectric properties are excellent, and the flame rating is V-0 by the UL94 method. Mechanical properties include outstanding impact strength, cut-through, and abrasion resistance.Statements, or data, regarding behavior in a flame situation are not intended to reflect hazards presented by this or any other material when under actual fire conditions.Typical End ProductsTefzel HT-2185 is ideal for many end products, including electrical components, such as sleeving, coil forms, sockets, connectors, and switches; lab ware, such as tubing, valves, containers, and fasteners; battery or instrument components that require chemical inertness; and mechanical parts.
