If the Japanese Ube PA6 plastic model you are looking for is not listed on it, please call our company to inquire. Our company sells a complete range of PA6 plastic models, as they are not listed one by one due to the large number of models.

Characteristics of Ube PA6 plastic raw materials in Japan:

- 1) High heat resistance, long-term use;
- 2) Excellent combination of rigidity and toughness;
- 3) Capable of withstanding significant strain despite strong temperature and humidity fluctuations;
- 4) Excellent dimensional stability with anti warping effect;
- 5) With high surface quality and smooth surface
- 6) Excellent strength and toughness, meeting the mechanical properties of structural components;
- 7) Excellent heat resistance, capable of continuous use at temperatures up to 130 °C ;
- 8) Long term fatigue resistance and good performance after thermal aging;
- 9) Excellent dimensional stability with anti warping effect;
- 10) Good surface effect, no floating fibers;
- 11) Good oil resistance and corrosion resistance
