产品详情

general description features me6208 series are low-dropout linear voltage regulators with a built-in voltage reference module, error correction module and phase compensation module. me6208 series are based on the cmos process and allow high voltage input with low quiescent current. this series has the function of internal feedback resistor setting from 3v to 5v. the output accuracy is $\pm 2\%$.

typical application electronic weighbridge scm phones, cordless phones security products water meters, power meters

features high output accuracy : $\pm 2\%$ input voltage : up to 18 v output voltage : 2.0 v ~ 12.0v ultra-low quiescent current (typ. = 3 μ a) output current : $i_{out} = 200\text{ma}$ (when $v_{in} = 7\text{v}$ and $v_{out} = 5\text{v}$) importation good stability : typ. 0.05% / v low temperature coefficient ceramic capacitor can be used package : sot89-3、 to92
