产品详情

q920 multimedia caller id phone with 7' tft color display phone, recording phone

more colorful , more efficiency more enjoyment

<innovation> <> <performance> <> <enjoyment>

introduction

the q920 multimedia phone delivers the latest technology and advancements in legacy telephony. enterprise executives, managers, and supervisors will appreciate the convenience and productivity benefits inherent in a large seven-inch screen, color graphic display design. users will not only benefit from the q920 multimedia phones extensive telephony capabilities, they will also experience its colorful, innovative, and productivity-enhancing applications delivered right to the display.

performance

the q920 boasts the powerful embedded operating system, which grants access to multimedia applications, such as music player, digital photo frame, call recording , etc. the q920 also built-in a standard usb port for data storage and file exchanges with pc. with a thumb disk, users not only be able to backup phone book and call recording file on pc, but also load the photos and music into the phone.

benefits

enhanced presence

the clear graphical color display shows current phone status, date and time, caller id, etc. the led lights capture your attention for incoming call notifications and new messages.

flexible communications

two analog telephone lines provide flexibility and capability of your making or receiving calls, and also conferencing calls.

easy call management

with four context-sensitive softkeys, up to 12 speed dial buttons , and notepad , the q920 provides press-to call with name based calling from users phonebook or call log.

call recording

with the built-in flash memory or external usb thumb disk, the q920 can record one to 300 hundred hours length of calls or conversations. the bigger storage of the usb disk, the more longer call recording.

office assistant tools

the q920 also can be easily access to its built-in calendar, calculator and recorder for daily business needs
