

# 振威主营优质硅土325-3000目

产品名称	振威主营优质硅土325-3000目
公司名称	广州振威化工科技有限公司
价格	2000.00/吨
规格参数	型号:硅土 品牌:台资 种类:塑料填充剂
公司地址	广州市天河区黄村路51号2405房（仅限办公用途）
联系电话	15218840795 13926165219

## 产品详情

### 硅土

硅土耐火硅土是指耐火度大于1580 、可做耐火材料的硅土和用作耐火材料的铝土矿。它们除具有较高的耐火度外，在高温条件下能保持体积的稳定性，并具有抗渣性、对急冷急热的抵抗性，以及一定的机械强度，因此经煅烧后异常坚定。硅土矿种类齐全，分布面广，按性质和用途可分为陶瓷硅土、耐火硅土、砖瓦硅土和水泥硅土。硬质硅土常呈块状或板片状，一般在水中不浸散，耐火度较高，为耐火制品的主要原料。耐火硅土中的硬质粘土用于制作高炉耐火材料，炼铁炉、热风炉、盛钢桶的衬砖、塞头砖。在陶瓷工业中，硬质硅土和半硬质硅土可以作为制造日用陶瓷、建筑瓷和工业瓷的原材料。

产品规格：325目、400目、600目、800目、1250目、1500目、2000目、2500目、3000目等

### silica

silica refractory silica is refers to the refractoriness is greater than 1580 , can do the silica refractory material and used as refractory bauxite. they besides have high refractoriness, under high temperature conditions can keep the stability of the volume, and has the ability of slag resistance and thermal shock resistance, and certain mechanical strength, and therefore very firm after calcination. silica minerals class is complete, the fenbumian wide, according to the nature and purpose can be divided into silica ceramic, refractory cement silica, brick and tile silica and silica. rigid silica often show block or plate shape, generally not immersed in water dispersion, high refractoriness, as the main raw material of refractory products. refractory silica in the hard clay is used for production of blast furnace refractories, ironmasters, hot blast stove, the ladle lining brick, brick. in the ceramic industry, semi-rigid and rigid silica silica can be used as a manufacturing daily-use ceramics, building ceramics and industrial ceramics raw materials.

product specification: 325 mesh, 400 mesh, 600 mesh, 800 mesh, 1250 mesh, 1500 mesh, 2000 mesh, 2500 mesh,

3000 mesh, etc

"振威主营优质硅土325-3000目"的CAS为优级，种类是塑料填充剂，原料为硅土，有效物质含量是98（ % ），型号为硅土，品牌是台资，主要用途为在陶瓷工业中，硬质硅土和半硬质硅土可以作为制造日用陶瓷、建筑瓷和工业瓷的原材料。 ，产品规格是25KG/包
