

# POWER-SONIC蓄电池PG-12V160FR铅膏12V166AH密封技术

产品名称	POWER-SONIC蓄电池PG-12V160FR铅膏12V166AH密封技术
公司名称	狮克电源（山东）有限公司
价格	385.00/只
规格参数	品牌:POWER-SONIC 型号:PG-12V160FR 产地:法国
公司地址	北京市昌平区沙顺路88号
联系电话	13240167779 13240167779

## 产品详情

### POWER-SONIC蓄电池PG-12V160FR铅膏12V166AH密封技术

智能充电是目前较先进的充电方法，原理是在整个充电过程中动态跟踪UPS蓄电池可接受的充电电流。应用du/dt技术，即充电电源根据UPS蓄电池的状态自动确定充电工艺参数，使充电电流自始至终保持在UPS蓄电池可接受的充电电流曲线附近，保持UPS蓄电池几乎在无气体析出的状态下充电，从而保护UPS蓄电池。该方法适用于对各种状态、类型的UPS蓄电池充电，安全、可靠、省时和节能。

The float charging process of the positive electrode plate corrosion battery can prevent the self discharge of the battery on one hand, and there is also a tendency to corrode the positive electrode plate, causing the gate plate material Pb to oxidize to PbO. Corrosion is accompanied by water consumption, an increase in electrolyte concentration, and accelerated corrosion of the positive electrode plate.

(4) If the working environment temperature of the battery is too high or the charging device voltage is out of control, the charging current and temperature of the battery will accumulate and mutually increase until the thermal runaway causes the battery casing to deform and expand, ultimately leading to battery failure.
