### 产品简介/ProductIntroduction

- 一、灯体使用高纯度压铸铝，型材铝预埋件，304不锈钢面盖，外观精美，导热性能优越
- 、灯体采月结构和灌股双重防水，低压供电保证近人灯具的安全性。
- 三、根据光学防眩光设计为软性线路板环绕周围侧向中心发光，光效均匀，对眼睛无伤害。
- 四、加厚钢化玻璃光损耗低，出光分布均匀，还原性强，内置本厂自行研发驱动，与灯珠参数高度匹配，效率稳定，品质更高，寿命更长。
- 五、标准DMX512协议，可定制RDM，DALI以及0-10V控制协议。
1. The lamp body uses high-purity die-casting afuminum, aluminum profile embedded parts,304 stainles stee cover, exquisite apearance andSuperior therma conductivity.2.The lamp body is designed with a dual waterproofing system,incorporating both structural sealing and resin flling. Low-voltage power supplyensures the safety of lighting fixtures in proximity to individuals, and anti-glare instructions have been included.3According to the optical ant-ghre design, the soft crcut board glws lateraly around the center, the ight efect is uniform, and there is no harmto the eyes.
4. Thickened toughened /as high penetration lens, low light lss,uniform ight distribution, strong reduciblity, buit-in self-developed drive bycur factory, high matching with lamp bead parameters, stable efficiency, higher quality and longer life.5Standard DMX512 rotocel.cusomizable RDMDALland 0-10V control protocol.
