LEXAN的介绍

LEXAN

LEXAN polycarbonate resin is an amorphous engineering thermoplastic, characterized by outstanding mechanical, optical, electrical and thermal properties. The LEXAN portfolio provides broad design versatility through its wide range of viscosities and product options such as: environmentally conforming flame retardancy, scratch resistance, toughness, heat resistance, weatherability, biocompatibility, optical quality, and compliance with stringent FDA and USP requirements.

LEXAN RESIN

LEXAN Polycarbonate (PC) and PC-based Resins offer impact resistance, outstanding dimensional stability and crystal clarity. LEXAN Resin is an amorphous engineering thermoplastic with high mechanical, optical, electrical and thermal properties. It is available with a wide variety of additives, including UV stabilizers and mold release agents. Grades include FDA-compliant, flame retardant, high flow, and glass reinforced.

PC LEXAN RESIN

Amorphous polycarbonate polymer offers a unique combination of stiffness, hardness and toughness. It exhibits

excellent weathering, creep, impact, optical, electrical and thermal properties. Available in many colors and effects, it was originally developed by SABIC.
