

WIFI BRIDGE 无线网桥

产品名称	WIFI BRIDGE 无线网桥
公司名称	深圳市福田区赛格电子市场誉园经营部
价格	103.00/台
规格参数	品牌:中性 型号:yy-wb22 接口标准:rj45
公司地址	中国 广东 深圳市福田区 深圳市福田区华强路赛格广场10楼10c17
联系电话	86 0755 83007952 15818621020

产品详情

802.11b/gwifi桥设备，其主要特点有：1、宽输入电压(dc5v—15v)、低功耗(2、特配三个并联的d c 电源接口：dc2.5电源孔、dc2.0电源插头、u s b 接头（取电用），方便用户与其他 i p 设备共用电源3、小巧轻便,易于悬挂于墙角等不宜布线的位置4、完全外置，标准 r j 4 5 以太网驳接，无需驱动可用于任何 i p 设备的接入5、高稳定性、及优越的无线网络传输性能确保 i p 监控解决方案的完美实施产品主要性能指标如下:1.支持wifi 桥模式2.符合ieee 802.11b/g无线网络传输协议;3. 支持wep (64 bit), wep (128 bit), wpa, wpa2 加密;4. 支持ssid broadcast.5. 频率: 2.4ghz6. 无障碍无线传输100米7. 一个标准 r j 4 5 以太网接头8. 三个并联的dc供电、取电接口9. 宽输入电压: dc5v-15v, 低功耗: 10.小体积: 1.5cm x 6cm xfeatures:1. the new addition of a usb wire is to connect a computer (desktop, laptop)for power,no need extra power adapter.2. it can be used for any wireless network products, such as wireless router, ip camera,azbox,eagle,dreambox,networkprinter,etc.make all network products with ethernet wireless.3. support any voip atas and voip phones;4. support wifi model: ap client;5. ieee 802.11b/g compliant;6. support wep (64 bit), wep (128 bit), wpa, wpa2 security access;7. support ssid broadcast.8. frequency: 2.4ghzspecification:1 10/100 base ethernet cable header;1 dc-2.0 female power port for power in;1 dc-2.0 male power port for power out;input voltage: dc5v-15v;consumed power: less than 1.5w;transmission distance indoor: 30mwhat is this?wifibrige is a device that allows your dreambox (or other devices) to be converted into wifi via an ethernet port. simplysetup the device to connect to your existing wireless network using a windows xp(windows 7) computer and then allow yourdreambox to have internet access.why would i need this?you need this device is you want to give your satellite lan box (or otherdevices) wireless access / internet. hence, thisdevice can become a wireless bridge.also, the wifibrige can do allot more and can be used for many wireless functions.satellite box software updates via the internet wirelesscccam or mgcamd server connection.make any other none wireless device wireless via an ethernet port to top it all you do not even need an extra power forthis it is capable of using any voltage between 8 to 15v so you put the dreambox power pin in the wifi bridge and and thewifi bridge out cable to the dreambox watch the demo videoand if you have a usb device such as dm800, dm7020, dm8000, azboz, xbox 360, ps3 etc etc... then you dont even need powerjust plug the usb cable into the usb slot of your device and it will take power from the usb.so a must have gadget in every house as it has unlimited possibilities.what comes in the box?dreamwisoftware/manual cd

"WIFI BRIDGE 无线网桥"的接口标准为RJ45，型号是YY-WB22，品牌为中性
