产品详情

美国邱健Trojan蓄电池J150PLUS 12V120AH可再生能源UPS电源

Product features:

1. Choose tight installation technology with good high rate charging and discharging characteristics.
2. By adopting a unique design scheme, the hydraulic push rod amount of the rechargeable battery has hardly decreased throughout the application process, and there is no need to drain water during the service life.
3. Select a unique corrosion-resistant pole aluminum alloy with a long service life.
4. All high-purity raw materials are used, and the lifespan of rechargeable lithium batteries is very small.
5. By using a combination of gas and technology, rechargeable batteries have high sealing performance, high efficiency, no alkali mist precipitation, safety and environmental protection, and zero pollution.
6. Using unique and highly reliable sealing technology to ensure the sealing of rechargeable batteries, application safety, and reliability.
