What are the pursuits in terms of performance and quality, and what are the ingenious designs incorporated into the use and delivery of ITA2 products? These are undoubtedly the entry points for understanding ITA2 products. Kun introduced that Edge, fog computing, manufacturing 2025, and smart living, which correspond to small and medium-sized applications, have brought a new wave of demand for high-quality and highly reliable product solutions. The new generation of small power UPS in ITA2 has emerged in this context. In terms of performance and quality, ITA2 low-power UPS has four core values of "reliability, innovation, and flexibility". Kun introduced that based on a new system level reliability design and rigorous testing of up to 948 items in 147 categories, ITA2 low-power UPS can meet the reliability requirements of special scenarios, which is something to be proud of. Electrical performance of ITA2 low-power UPS。
