

感应灯雷达模块3~20meter Intelligent street light person Radar路灯雷达方案

产品名称	感应灯雷达模块3~20meter Intelligent street light person Radar路灯雷达方案
公司名称	上海渭成智能科技有限公司
价格	4.00/个
规格参数	品牌:WAYKING 型号:WK58-M4 产地:上海
公司地址	北沿公路2111号3幢127-34室
联系电话	17811984608

产品详情

person Sensing Radar people come, lights come on, leave go out , garden lamp sensing radar controlled street light

3~20meter Intelligent street light person Radar路灯雷达方案

Wayking WK58-M4 is a 5.8Ghz millimeter-wave radar sensor developed by Wayking Technology Co., Ltd.

The radar sensor has a small size, cost-effective and scalable design. This design makes it possible for Wayking to offer custom solutions, enabling the radar sensor to be installed as standard equipment in all Lamps segments.

Technical Data

WAYKING RADAR integrates the person Sensing Radar people come, lights come on, leave go out , garden lamp sensing radar controlled street light.

When someone approaches the courtyard gate, the courtyard light can sense the target at a distance of up to 3~20 meter and light it up

Functional features

Technological exchanges : wayking@wayking.top

Stable economy universal

Warehouse chandeliers and hall lights are preferred, with serial port function, which can adjust the sensing distance, delay and other parameters through the serial port.

Sensing distance, wider angle than infrared sensing module, no dead zone, lens and lens aging problems.

It is more stable than 3G products, not affected by base stations, etc., and is not affected by temperature, humidity, airflow, dust, noise, brightness and darkness, etc., and has strong anti-interference ability.

Built-in MCU, embedded multiple digital filtering algorithms, stronger anti-interference ability, more application scenarios, and a wider range of adaptable products.

智慧路灯模组采用ADT3102芯片内部集成信号处理器,可直接输出感应控制信号, 外围搭配元器件形成完整的微波感应传感器。可以满足人来灯亮人走灯灭、车来即亮车走即灭等应用场景的低功耗需求, 是配合节能省电环保的自主产品。

基于微波雷达探测模块的感应式LED照明灯, 通过对信号的检测、放大、整形、多重比较等处理, 让照明灯具有电路工作状态不受自身灯光的影响和安装简易等优点, 能够做到人到灯亮、人走灯灭、车来即亮、车走即灭的效果。
