电绝缘隔热材料用陶瓷纤维纸厂家价格

产品名称	电绝缘隔热材料用陶瓷纤维纸厂家价格
公司名称	东营断热节能材料有限公司
价格	280.00/箱
规格参数	品牌:祥雨 型号:1260 使用温度:1000
公司地址	东营市西城西三路206号【西城工作联系处】
联系电话	0546-8615291

产品详情

绝缘隔热材料,陶瓷纤维纸简介:

??	
??mm	0.5-6
??(kg/m3)	180±200
????(?)	950?1100?1200
????(?)	800?1000?1260?1350
????(kn/m)	0.3-0.90

ceramic fiber insulation paper

introduction: to ceramic fibers as main raw material, the use made of wet forming process, high temperature resistance, chemical corrosion, thermal shock, low thermal conductivity, high dielectric strength and high elastic modulus and other properties. characterized as non-asbestos, fiber length, the ball less residue, a small bulk density, strength, flexibility, and ease of punching, winding, such as construction operations. applicable to high temperature insulation, thermal insulation, sealing, electrical insulation, sound-absorbing, filtering and so on, can take the place of asbestos products, is an advanced light-weight refractories

performance thickness 1-6 bulk density (kg/m3) 180 ± 200 temperature (?) 950,1100,1200 classification temperature (?) 800,1000,1260,1350 tensile strength (kn / m) 0.3-0.90 usage: all kinds of industrial furnaces and steel package, casting barrels, submerged entry nozzle of the high-temperature insulation materials, industrial electric insulation and electrical insulation materials, and the furnace door seal expansion joints, cast aluminum liner model, microcrystalline hot melt glass and glass??, high temperature gasket, apparatus, equipment, heating equipment and electrical insulation of the insulation material, the muffler car muffler insulation materials, exhaust pipe insulation materials. packaging: the membrane form of the supply of packaging for plastic bags, packing for the carton.
