### 常熟DHL快递邮寄全球 常熟DHL国际快递高效服务

Russia cannot destroy or abandon any goods at local customs. If the required customs clearance documents provided by DHL are not received within 10 days after the goods arrive, the goods will be returned to the place of origin for further processing.

All packages sent to Brazil by express delivery must have the recipient's local CNPJ number filled in on the waybill and commercial invoice. The local customs will conduct 100% inspection on imported packages. If the CNPJ number is not indicated on the invoice and waybill as required when the package is shipped, Brazil will automatically return the package to the place of origin and charge a return fee to the place of origin.

### 常熟DHL快递时效3-6天左右

Reminder: Local customs will impose tariffs on packages sent to Brazil regardless of their value and weight.

In recent years, international logistics has developed rapidly, with information flow, capital flow, logistics and other links. Logistics, as the physical flow link of the entire process, plays a crucial role in the quality of its execution results for international logistics.

We know that the transportation process of international logistics is a process with many intermediate links and a long

time. Throughout the process, packages are inevitably subjected to compression, moisture, and other situations. Once such situations occur, customers often complain, which is extremely detrimental to the reputation accumulated through hard work and affects the development of accounts. Therefore, as a successful international logistics expert, the packaging of international mail must also be carefully considered. In order to solve the doubts of international logistics customers, Generation International has purchased a batch of "bubble film" and "battery cardboard boxes" that are particularly suitable for international logistics customers to use for shipping, which greatly guarantees customer interests and is deeply loved and supported by customers.

Advantages of bubble film:

- 1、防止货物在运输中的碰撞，气泡膜作为缓冲材料\*为合适，安全；
- 2、减少磨损和表面刮伤的气泡片，卷材是易碎或贵重物品的理想，灵活的保护包装材料；
- 3、产品防静电，用途广泛；
- 4、先进的密封技术可使气泡保留空气从而保护产品不受撞击和磨损；
- 5、可根据需要在气泡上复膜，使之更坚韧，防止撕破；
- 6、相比其他填充材料更节约空间，材料轻便，节省运输成本；
- 7、环保，可回收利用；

电池纸箱的优势：

- 1、标准尺寸；
- 2、AA标准生产纸质；
- 3、环保，可回收利用；

包装材料购买须知：

- 1、客户可以到本公司自提包装材料；
- 2、客户需提前准备好【物料申请单】并盖公章；
- 4、【物料申请单】需求数量，请提前一天联系行政部提前准备好
