

出售 ADVANTEST U3851 跨域分析仪

产品名称	出售 ADVANTEST U3851 跨域分析仪
公司名称	深圳市皓辰电子科技有限公司
价格	面议
规格参数	
公司地址	成都市武侯大道优博国际2 - 1018
联系电话	028 - 85224905

产品详情

the u3800 also enables multi-pass analysis, and greatly simplifies the process of identifying and suppressing em radiation noise. the u3800 series utilizes a new "x math" (pronounced "cross math") function for comparative analysis of inputs from two channels. this function displays the waveforms of both signals on a single coordinate plain, enabling operators to see the phase difference between the signals at a glance.

the u3800 is available in three configurations with varying frequency ranges and price points, allowing customers to select the product that best meets their needs.

key features and specifications

configurations - u3841, u3851, u3872

frequency range - u3841: 9k~3ghz, u3851: 9k~8ghz, u3872: 9k~43ghz

rf input - 2 channels (simultaneous phase measurement possible)

analysis functions - power vs. time, frequency vs. time, phase vs. time, iq vs. time, high-speed fourier transform analysis, etc

channel balance - $\pm 2.0\text{db}$

phase measurement - 15deg(cbw 100khz/1msec per 1ghz)
