

# 济宁市UPS国际快递 济宁市UPS国际快递服务中心 航空拖运

产品名称	济宁市UPS国际快递 济宁市UPS国际快递服务中心 航空拖运
公司名称	安徽瀚徽国际货运代理有限公司
价格	12.00/千克
规格参数	服务类型:国际快递门到门服务 服务区域:全境取件上门 服务时效:全球3-7天送达
公司地址	安徽省合肥市肥西县桃花镇香蒲路安徽永凯工贸 有限责任公司研发中心1栋202（注册地址）
联系电话	18021337385 18055119447

## 产品详情

UPS (NYSE: UPS) is expanding its specialty pharmaceutical offerings by establishing UPS Cold Chain Solutions, a comprehensive suite of cold chain technologies, best-in-class capabilities, and new and expanded global facilities providing complete, end-to-end temperature-controlled logistics.

“ Our customers have been taking advantage of our cold chain capabilities for years, but the pandemic caused UPS to move even faster to enhance an integrated set of cold chain solutions to support the future of the pharmaceutical and medical device industry, ” said Wes Wheeler, UPS Healthcare president. “ UPS ’ s near-perfect, on-time delivery of the COVID-19 vaccine proves how effectively and efficiently our network handles biologically derived drugs, even at extreme temperatures. ”

Chronic and life-threatening diseases, including cancers, respiratory, autoimmune and cardiovascular conditions, are the fastest growing disease categories in the world, creating a rapid acceleration in the development of biologically derived, temperature-controlled drugs and therapies. According to the Biopharma Cold Chain Sourcebook, cold chain trends show 48 percent growth between 2018 and 2024 for drugs that require at least 2 to 8 degrees Celsius storage and shipping. Additionally, the overall market for cold chain services (packaging, transportation and data services) is expected to significantly accelerate growth over the next three years, growing by 24 percent by 2024, after posting a 10 percent increase from 2019 to 2020.

“ The future of the healthcare and specialty pharmaceutical industries will increasingly rely on robust cold chain networks to safely deliver temperature-controlled drugs and therapies to customers, ” said Kate Gutmann, UPS chief sales and solutions officer and SVP, UPS Global Healthcare. “ The continued evolution of our cold chain offerings ensures UPS is ready for the future and can continue to provide long-term value for our healthcare customers. ”

Managing temperature excursion end-to-end

UPS Cold Chain Solutions is purpose-built to provide pharmaceutical companies, healthcare providers and laboratories a full, end-to-end cold chain service offering, including storage and distribution, transportation, visibility, and quality assurance capabilities to meet their complex demands for critical products around the world.

As part of a continued, aggressive strategy to build sophisticated capabilities in cold chain logistics, UPS Healthcare is expanding and augmenting its temperature-controlled products and services, including:
