For 85 years, Trojan Battery Company has utilized its experience and expertise in deep cycle technology to manufacture high-quality deep cycle batteries in the industry. Our accumulated experience over the years is that truly outstanding batteries must be long-lasting and durable

The OverDrive battery features a series of special designs that enable it to provide long-lasting energy storage, meeting the needs of high load auxiliary power systems (APUs), refrigeration, and lift door applications.

If the wrong type of battery is selected, its performance will be greatly reduced, its lifespan will be greatly reduced, and it will also waste money. Most liquid rich batteries and dual function AGM batteries are suitable for intermittent power supply and cannot be applied to specific needs. Trojan OverDrive AGM 31 Provide high power cycling for a long period of time to provide the capability of 730 cold start current.

Trojan的OverDrive AGM31电池是一种真正的深循环电池，设计工艺保证能够承受多次深度放电等苛刻条件，其冷起动电流CCA值能够达到730安培，可满足高负荷发动机的启动需求。OverDrive电池在设计上的一些特点的一系列的特殊设计，使它能够提供持久的能源储存，满足高

负荷辅助动力系统 (APU)、冷藏和提升门应用的需要。
