

淮安DHL国际快递 淮安DHL国际快递公司

产品名称	淮安DHL国际快递 淮安DHL国际快递公司
公司名称	安徽敦航国际货运代理有限公司
价格	29.00/千克
规格参数	DHL:国际快递 国际空运:全球送达 上门取件:免费包装
公司地址	安徽省合肥市肥西县玉兰大道与长安路交口柏堰商业服务中心门面C1-18、19号
联系电话	15955942666 18010889846

产品详情

Exporting

Pros

- Often allows for greater economic activity leading to higher revenue
- May result in production efficiencies due to scaling manufacturing
- May result in greater innovation and R&D through working with foreign partners
- May reduce operational risk in some areas as revenue streams become more diversified

Cons

- May result in high transportation charges
- May not be achievable by smaller entities due to lack of knowledge and resources
- May result in currency exchange risk due to devaluating currencies
- May increase operational risk in some areas due to unknown political or geographical risks

Real-World Example of Exports

Every year, the United States is usually one of the top exporters of automotive vehicles. As domestic companies manufacture cars, trucks, and other vehicles, these are shipped around the world and used by non-U.S. entities.

In 2020, the Observatory of Economic Complexity reported that the United States was the world's third largest exporter of cars, distributing \$47.6 billion of vehicles around the world.³ The United States distributed over \$10 billion worth of vehicles to Canada, with other top being countries receiving U.S.-made vehicles being Germany, China, Belgium, and South Korea.

Alternatively, the United States was also the top importer of vehicles in 2020. It imported \$144 billion of cars, most of which came from Japan, Canada, and Mexico.³

Of the U.S. manufacturers that distribute goods around the world, BMW Manufacturing led domestic companies by the value of cars exported. In 2021, BMW exported nearly 260,000 vehicles to roughly 120 countries, an export total of more than \$10 billion. 2021 was the eighth consecutive year that BMW Manufacturing led automotive exports by value, and more than 24% of the company's exports were delivered to China.⁴

What Is Export Policy?

[Export policy](#) is the government legislation that dictates how, what, when, and with whom a country exports goods. Export policy defines the tariffs, customs requirements, and limitations on international trade for each country.

Is It Better to Export Goods Than Import Goods?

For each country, this answer will be different. In many cases, it is best to import some goods and export others. Each country is often more proficient in manufacturing certain goods based on their climate, citizen skillset, or access to raw materials. Therefore, it's arguably best for a company to manufacture and export what it is more efficient at doing so and revert to importing other goods where it may be economically challenging to produce on its own. A great example is produce where certain countries simply have better arable lands and climate conditions to grow certain goods over others.

What Are the Largest U.S. Exports?

The United States largest exports include mineral fuels, machinery, vehicles, medical apparatus, and aircraft.⁵

Who Is The World's Largest Exporter?

Based on most recent export information available for 2020 and 2021, China is the world's largest exporter, followed by the United States, Germany, France, and the United Kingdom.¹

The Bottom Line

An export is a good that is produced domestically but sold to a consumer overseas. Due to resource constraints, economic policy, and manufacturing strategies of each country, it sometimes makes more sense for countries to make goods to sell for revenue as opposed to retain for consumption.
