产品详情

dial depth gauge can be used to measure depth and steps of work and thickness of paint membrane.									
measuring range : 10mm									
dm-210									

measuring range : 5mm

dm-250

for measuring print circuit board

dm-251

measurement example

measuring range : 20mm

dm-224

measuring range : 30mm

dm-230

p series scale mark 0.1mm indication type.its space is direct reading which makes reading 0.1mm~0.9mm scale mark easily.1~10mm can be read by short hand and figure below decimal can be read as it is by long hand.it prevents misreading.

(ex.) reading 3.18mm

dm-210p

back plunger type

reading from the top of the

part to be measured or front face is easy.

dm-273

round base type

dm-280

gauge movement type

steps can be easily measured by shifting gauge to 3 fitting holes.

		dial gauge can be moved.	
		dm-293	
		digital depth gauge is utilized to measure depth and steps of work.this can print out measured data and treat statistics calculation by connected to the optional digital mini printer sd-763n.
