Celstran PA66-GF50-02 P7/12PA66塞拉尼斯(Celanese)产品描述

Material code according to ISO 1043-1: PA66尼龙66Heat stabilized Nylon 66 reinforced by 50 weight percent long glass fibers. The pellets are cylindrical and normally as well as the embedded fibers 7 mm long.Parts molded of CELSTRAN have outstanding mechanical properties such as high strength and stiffness combined with high heat deflection. The notched impact strength is increased at elevated and low temperatures due to the fiber skeleton built in the parts. The long fiber reinforcement reduces creep significantly.The very isotropic shrinkage in the molded parts minimizes the warpage.Complex parts can be manufactured with high reproducibility by injection molding.Can be used for substituting die cast metal with the advantage of Weight reduction, no corrosion problems, no post
