

80公斤生物质蒸汽发生器(可带12个大烫)、生物质锅炉供应商

产品名称	80公斤生物质蒸汽发生器(可带12个大烫)、生物质锅炉供应商
公司名称	台州市地中海热能设备制造有限公司
价格	面议
规格参数	类型:全自动蒸汽发生器 出口压力:高压
公司地址	台州市路桥区路南街道南岸村
联系电话	13586069303 13058682111

产品详情

蒸汽发生器特性:

齐备功能,一机搞定 高效节能:本蒸汽发生器采用最先进的全正压燃烧方式,独特的一次风加热、二次风助燃配置,使得燃料燃烧完全,锅炉本体多回程布置,结构紧凑,受热面充足,升压出汽极快;炉内选用新型耐火材料,强化燃烧并可延长本体使用寿命,是最新型的环保节能型产品。

安全可靠:锅炉采用全自动微电脑控制系统,设备运行自动控制,带有超压和缺水连锁保护功能,生物质进料系统采用平进加斜落料相结合的设计理念,彻底消除了生物质燃烧燃料回燃的现象,真正达到了本体控制安全与燃烧系统控制安全的双保险。

精巧美观:因产品的不断革新和改进加强了实用性,造型新颖,特别是体积小、无需基础、安装方便、产品外形美观、色彩柔和,与环境协调一致,富有艺术感。

燃料广泛:用于燃烧的生物质原料可就地取材,固体成型生物质燃料是利用木屑、枝丫、锯末、梢头、板皮和截头、果壳、秸秆、稻杆、牛粪等废弃物经过机械加工产出具有规则形状的颗粒状、棒状或块状的燃料,成本低廉、来源广泛。

经久耐用:设计细致、选材严格,采用高薪技术精心制作,具有最优的防腐性、耐久性和坚固性。

适用范围:适合服装熨烫、电镀加热、化学加工、食品加工、学校、医院、酒店、饭店等。具有消毒、烘干、蒸煮、取暖多种功能。

steam generator characteristics : one machine, full functions.

energy efficient : the steam generator uses the most advanced positive pressure combustion method. it has unique primary air heating and secondary air combustion configuration. it can completely burn off the biomass particle. the boiler has multi-return arrangement, compact structure, adequate heating surface, and can boost, outlet the steam fast;

the furnace uses the new refractory materials, supplemental firing, and extend the service life of the boiler. it is the newest environmental protection and energy saving products.

safe and reliable : boiler has the automatic microcomputer system, automatic control of boiler operation, owning overpressure protection and water scarcity functions. biomass feed system combines with flat and aslant falling way in design, completely eliminate the phenomena of biomass fuel combustion backdraft, thereby really achieve the double insurance that body control the security and safety of the combustion control system.

delicate design : due to continuous innovations and improvements, the products enhance the practicality and novelty. especially in the aspects of small size, without foundation, easy installation, beautiful appearance, soft colors, harmony with the environment, full of artistic sense.

wide range of fuel: biomass materials for combustion can use local materials. solid biomass fuels uses woods, branches, saw dust, topwoods, skins and butts, husk, straw, rice straw, manure and other waste products through mechanical processing a particulate with regular shape, rod or block fuel. the advantage of it is low cost and wide range of sources.

durable: careful design, superior materials, using high technology to elaborate, with excellent corrosion resistance, durability and ruggedness.

application range : apply to clothing iron, plating heating, chemical processing, food processing, schools, hospitals, hotels, restaurants, etc. has the functions of disinfection, drying, cooking, heating and so on.

本产品的加工定制是否，类型是全自动蒸汽发生器，出口压力是高压，燃烧方式是室燃炉，循环方式是自然循环锅炉，品牌是地中海锅炉，燃料耗量是一小时13公斤生物质燃料，蒸汽产量是每小时80公斤，有效水容积是26L，重量是390KG，用途是服装、电镀、化学加工、食品加工、学校、医院、饭店等，最高温度是172，尺寸是1140*545*1430，结构形式是立式，属性是属性值
