electronic monitoring wrist strap

description

as we approach the year 2000, more and more companies are going for the ISO qualification. the common aim is to produce high quality standard products. in the electronics industries, electro-static is the major concern to all manufacturers.

the wrist strap is a device specifically designed to solve this problem. it draws static from the human body continuously and has an instant warning with lamp and alarm to warn the user should the wrist strap fails or the grounding is disconnected.

features

- no checking is required
- instant warning of wrist strap failure, improve production quality
- highly reliable, easy and convenient
- small and handy, easy and convenient
- low price, save cost

-- for your convenience, you can use any wrist strap with banana plug in the market.

-- p1 --

specification

model -- surpa 518-1 input -- 6v dc

material -- polystyrene

dimension -- 67 * 60 *29 (mm)

weight -- 60gm (not including power supply adaptor)

how to use

(1) ground the device

-- p.2 --

(2) power supply

(3) insert the wrist strap

-- p.3 --

(4) turn on the on/off switch

(5) resistance alignment

due to this device is sensing the human body ' s resistivity, and almost all people are different from each other, this device will suit all users. this device can be pre-set to suit most users too.

(a) if the body resistance is low, turn left to increase the resistivity. when the lamp is lighted green, you are in the right position.

(b) if the body resistance is strong, turn right to reduce the resistivity. when the lamp is lighted green, you are in the right position.

本产品的加工定制是是，类型是在线监控仪，品牌是SURPA，型号是518-1，测量范围是0-1.5m，安装方式是盘面式，外形尺寸是0 (mm)
