

# FU-33 ( 833A ) 电子管

产品名称	FU-33 ( 833A ) 电子管
公司名称	无锡普泰科技有限公司
价格	面议
规格参数	产品类型: 品牌:GTVAC 型号:FU-33 ( 833A )
公司地址	无锡市高浪东路999号 ( 网络研发楼 ) 105室
联系电话	0510-82301121 13665170781

## 产品详情

### fu-33 ( 833a )

the fu-33(833a)is a wind cooled, ceramic—metal high- mu amplifier factor triode containing ahydrictungsten carbide cathode. the rated plate dissipation is 1kw, and the highest output power is more than1kw.it is designed for mainly used general characteristics. it ' s application for broadcast communicate and high- frequency hearing.general characteristics filament voltage ..... 10 vfilament current

..... 9.4--10.6a

inter electrode capacitancegrid plate ..... 5.5--7.1 pfgrid

cathode ..... 10.1—14.5 pf cathode plate

..... 6.4—10.6 pfconductance (10 kv/4a)

..... ma/vamplification

..... 31.5-38.5u

operation frequency

..... 30mhzanodevoltage.....

34kvanode current ..... 415/450ma

grid current ..... 40-70/80-120ma

grid impedance ..... 3.5/5 k output

power ..... 1000w/ more than

application ..... broadcast communicate and high- frequency hearing.

cooled style ..... wind cooled

matched no. of overseas ..... 833a/833c

本产品的产品类型是放大二极管，品牌是GTVAC，型号是FU-33（833A），材料是砷(As)，功率特性是大功率，最高反向电压是12，LED封装是有色透明封装(C)，封装形式是功率型，结构是面接触型，正向直流电流IF是8，发光颜色是电压控制，封装材料是玻璃封装，频率特性是超高频，发光强度角分布是高指向性，出光面特征是圆灯
