

G82216压力真空度测试仪

产品名称	G82216压力真空度测试仪
公司名称	北京冠测精电仪器设备有限公司
价格	面议
规格参数	加工定制:是 品牌:冠测 型号:G82216
公司地址	北京市海淀区永丰信息产业基地新材料创业大厦 B座429室
联系电话	010-57223837 15311714256

产品详情

压力真空度测试仪用于测量汽水饮料压力、co2、罐头真空度

pressure vacuum degree measuring instrument for measuring the soda beverage canned, co2 pressure, vacuum degree

注：该产品已获国家级新产品证书及专利证书。

note: the product has won the national new product certificate and patent certificate.

罐头真空度,汽酒饮料、压力测量仪适应部门：

canned vacuum, sparkling wine drink, pressure measuring instrument to adapt to the department:

1、食品生产厂家自检产品质量。

1, self-inspection of food manufacturers, the quality of the product.

2、食品卫生监督检验，科研、教学。

2, the food hygiene supervision and inspection, scientific research and teaching.

3、工商、物价、海关、技术监督、商为部门，进出口商检、质检等

3, customs, industry and commerce, prices, technical supervision, business department, import and export commodity inspection, quality inspection, etc

一、压力真空度测试仪主要结构：

a, pressure vacuum tester main structure:

1、本仪器配有两个表头（显示器/2个表头，一个用做测负压一个用做正压测量）均为2.5级精度，y60 0 - 0.6mpa用于测量汽酒、汽水、啤酒、饮料co2压力。yz60-0.1 - 0 - 0.15mpa用于测量罐头真空度及罐头胀罐（胖听）正压范围，用户可根据需要互换使用（严禁错用显示器）。

1, the instrument is equipped with two headers (display / 2 header, one for measuring the negative pressure is used for pressure measurement) are 2.5 accuracy, y60 0-0.6 mpa for measuring the sparkling wine, soda, beer, beverage co2 pressure. yz60-0.1-0-0.15 mpa canned canned for measuring the vacuum degree and bilge tank (swell) positive pressure range, the user can according to need to be used interchangeably (do not misuse the display).

2、连接杆可根据需要接装使用（分两节、一节）

2, connecting rod can be used according to the need to connect with (two sections, section)

3、微调螺帽：用于调整柱塞的行程，以决定刺入的深度。

3, trimming nut: used to adjust the plunger stroke, to determine the depth of the pierce.

4、顶针：是hxj8ml-1型罐头真空度、汽酒饮料压力测量仪的重要部件，与表头采用密封连接并经特别处理组成显示器（注意保持畅通或防止内孔生锈腐蚀）。

4, thimble, is canned hxj8ml - 1 type vacuum degree, an important part of a sparkling wine beverage pressure measuring instrument, connected to the header used seal and the special treatment of the display (note the unblocked or prevent inner hole rust corrosion).

二、压力真空度测试仪测量范围：

second, the vacuum pressure tester measuring range:

1、对罐装食品限量：-0.1 - 0 - 0.15mpa

1, the canned food limited: 0.1-0-0.1 mpa

2、对汽酒、汽水、啤酒、饮料压力限量：0 - 0.6mpa

2, pressure of sparkling wine, soda, beer, beverage limited: 0-0.6 mpa

3、测量高度：5mm - 320mm

3, measuring height: 5 mm - 320 mm

4、最大测量直径：160mm

4, the maximum measured diameter: 160 mm

三、压力真空度测试仪工作方式：

three, vacuum pressure tester works:

双功能，手动间断，刺入式。

the double function, manual, pierce.

针孔外边的密封胶的直径：15-20mm

pinhole outside the diameter of the sealant: 15-20 mm

可测金属瓶盖，罐头的密封性

sealing of measurable metal bottle caps, cans, etc

精度：2.5级

accuracy: 2.5 on the richter scale are unlikely

注：测量co2是查表得出数据

note: measuring co2 is look-up table data are obtained

pressure vacuum degree tester for measuring soft drinks, co2, degree of vacuum pressure

pressure vacuum degree tester for measuring soft drinks, co2, degree of vacuum pressure

note: this product has been awarded the certificate of national new product certificate and patent.

note: this product has had been awarded the certificate of national new product certificate and patent.

degree of vacuum, carbonated beverage, pressure measuring instrument to department:

the degree of vacuum, carbonated beverage, pressure measuring instrument to department:

self checking products 1, food manufacturers quality.

the self checking products 1, food manufacturers quality.

2, food hygiene supervision and inspection, scientific research, teaching.

2, the food hygiene supervision and inspection, scientific research, would.

3, industry and commerce, price, customs, and technical supervision department, business, import and export commodity inspection, quality inspection etc.

3, industry and commerce, price, customs, and technical supervision department, business, import and export commodity inspection, quality inspection etc.

the main structure, pressure and vacuum degree tester:

the main structure, pressure and vacuum degree tester:

1, the instrument is equipped with two meter (/2 meter display, a negative pressure be measured with a positive pressure measurement) were 2.5 precision, 0 y60 0.6mpa was used to measure the sparkling wine, soft drinks, beer, beverage co2 pressure. yz60-0.1 0 0.15mpa is used to measure the degree of vacuum and can swell (swell) positive

pressure range, the user can according to need to exchange use (no misuse display) .

1, the instrument is equipped with two meter (/ 2 meter display, a negative pressure be measured with a positive pressure measurement) were 2.5 precision, 0 y60 0.6 mpa was 2 measure the sparkling wine, soft drinks, beer, beverage co2 pressure. yz60-0.1 0 and 0.15 mpa is 2 measure the degree of vacuum and can swell (swell) positive pressure range, the user can "according to the need to exchange the use (no misuse the display).

2, the connecting rod can be connected using (divided into two sections, section)

2, the connecting rod can be connected using (means into two sections, section)

3, the trimming nut: used to adjust the stroke of the plunger, to determine the penetration depth.

3, the trimming the nut: 2 adjust the stroke of the plunger, to determine the penetration of the depth.

4, the thimble: is an important part of hxj8ml-1 degree of vacuum, sparkling beverage pressure measuring instrument and meter, the sealing connection and after special treatment composition display (keep smooth or prevent hole rust) .

4, the thimble, is an important part of hxj8ml 1 degree of vacuum, sparkling beverage pressure measuring instrument and meter, and the sealing connection and after special treatment composition display (keep smooth or prevent hole rust).

two, pressure and vacuum degree tester measuring range:

two, pressure and vacuum degree tester measuring range:

1, the canned food limited: -0.100.15mpa

1, the canned food limited: - 0.100.15 mpa

2, to the sparkling wine, soft drinks, beer, beverage: 00.6mpa pressure limit

2, to the sparkling wine, soft drinks, beer, beverage, 00.6 mpa pressure limit

3, height: 5mm320mm

3, height: 5 mm320mm

4, the measured maximum diameter: 160mm

4, the measured maximum diameter: 160 mm

three, work pressure vacuum degree tester:

three, the work pressure vacuum degree tester:

dual function, manual intermittent, penetrating.

dual function, manual intermittent, penetrating.

outside of the sealant pinhole diameter: 15-20mm

outside of the sealant pinhole diameter: 15-20 mm

measurable metal cap, sealing cans etc.

measurable metal cap, sealing as cans etc.

accuracy: 2.5

accuracy: 2.5

note: the co2 measurement is check the data

note: the co2 measurement is check the data
