

SCB10-315三相电力变压器机床专用变压器

产品名称	SCB10-315三相电力变压器机床专用变压器
公司名称	乐清市浙鑫电气有限公司
价格	面议
规格参数	电压比:10KV/0.4KV 电源相数:电力变压器 额定功率:315
公司地址	浙江温州乐清浙鑫工业园
联系电话	86-0577-62707759 4000818878 13587959951

产品详情

我公司多年来采用优质材料和先进的工艺技术专业生产160va到300kva之间，zhy2(jsj)系列三相伺服变压器，是我公司参照国外同类产品最新研究开发的数控系统用变压器，能代替西门子公司4ap、4pu系列变压器，产品符合vde0550、iec439、jb/t5555、gb5226等国际、国家标准。

zhy2(jsj)系列三相伺服变压器广泛适用于交流50~60hz,输入、输出电压不超过500v的各种三相供电场合。

产品的各种输入、输出电压的高低、联接组别、调节抽头的多少及位置(±5%)、绕组容量的分配、次级单相绕组的配备、整流电路的运用、是否要求带壳等，均看根据用户要求进行精心的设计与制造。

for many years, our company has adopted the high quality material and advanced technology, professionally produced the 60va to 300kva, zhy2(jsj) series three-phase dry transformer is the latest designed and researched digital control system transformer based on the same products of foreign country, which can be instead of 4ap 4au series transformer of siemens company. products are in accordance with vde0550, iec439, jb/t5555, gb5226 international and national standard.

zhy2(jsj) series three-phase dry transformers widely uses to ac50~60hz, input、output voltage less 1000v various three-phase power supply places.

everything can be designed and made carefully and exquisitely according to user's requirement, including the various input and output voltage, coupling group, tap adjustment and position (general in ± 5%)、winding capacity distribution, sub-grade single-phase winding disposition, ration current operation and need the outer case or not etc.

本产品的电压比是10KV/0.4KV，电源相数是电力变压器，额定功率是315，防潮方式是开放式，冷却方式是自然冷式，冷却形式是干式，频率特性是低频，品牌是国产，铁心形状是阶梯型，外形结构是立式，效率()是100%，型号是ZHY2,JSJ315KVA，绕组数目是多绕组，铁心结构是壳式，应用范围是电力
