### 产品详情

gsg vernier masters are used to calibrate and set vernier calipers. the master is superior to gage block calibration because they do not require block stacks and therefore it is much faster to inspect linear range of the tool. in addition they indicate wear on the caliper anvils because both the id and od jaws are inspected without additional setup. model # vc-1e (english) model # vc-1m (metric) 1.00-6.00 diameter in 1.00 increments for outside jaws, 1/2 to 4 1/2 inside jaws. +/- .0002, 25-150mm diameter in 25.0mm increments for outside jaws, 12.5 to 112mm for inside jaws +/- .005mm case hardened, stabilized, ground and lapped to +/- .0002. larger sizes are available upon request.
