product features:

wrist strap products, more convenient operation

power line / video line without switching, no parts loss troubles

3.5 inch large screen high definition lcd display, simple, beautiful, easy to use

dc12v 500ma power output, for most cameras (including infrared light) to provide emergency power supply,

ntsc, pal auto adapt and display,

audio input test, test adapter and other audio signal

battery low voltage led alarm display, direct and concise

automatic power saving (low power mode) function, the use of longer, environmental protection and low power consumption, a charge 3-4 hours, can be used normally for 5 hours

overview of the:

this instrument is a testing tool for video monitoring site installation, maintenance and development, it

has a video display, network / video line line, dc12v/500ma power output, audio test function.

the instrument function is complete, easy to use, easy to carry, is engineering installation and maintenance of the front camera equipment, improve efficiency, reduce the cost of the project a good helper.

power xiangjie:

video test:

video monitoring instrument, built-in high-definition 3.5 inch (resolution 960*240) large screen digital lcd monitor, connecting the front camera through the video in interface of the instrument, can be intuitively easy to see the camera image effect. the lcd monitor brightness, adjustable, suitable for field construction and maintenance;

audio test:

audio test function of video monitoring test instrument, to video monitoring front end pickups and other audio equipment test;

emergency supply.

video monitoring test instrument specifically for the camera and the design of the power supply to the output port of 12v/500ma, provide a temporary power supply for the camera. mainly used in some cameras live demonstration and testing, at the same time, for some need to install the camera field, because prior to the implementation of the project site has no power, must find the temporary power supply for the camera power supply, power output of pk67 will play a necessary role, 12v/500ma emergency power supply, can drive the general infrared camera;

运输方式：

物流发货运输（首选德邦物流、新邦物流等）、快递发货运输（首选优速，速尔等）

温馨提醒：如果订货量大，建议使用物流发货运费，费用成本低，货物保护性高。

本产品的加工定制是是，类型是视频监控仪，品牌是爱博翔i-pook，型号是PK67A，安装方式是腕带式，分辨率是960*240，外形尺寸是102*75*31（mm）（mm）
