无关外延：

In a loud voice, the terrible king said that he would win against God. That's why he ordered that a magnificent ship be built in order to go to the heaven. He said he would ride the ship to go and defeat God. The terrible king rode the ship up to heaven.

From the sky, an angel was sent. However, the terrible king shot over a thousand bullets at the angel. "Ahhhhhh" Being shot, the angel was bleeding. The blood dropped unto the terrible king's ship. The angel's blood was so heavy that the king's ship sank.

The terrible king became angry, again. "Build a more stronger ship." The terrible king wanted a better ship, so he

ordered all the workers in his kingdom to build it. "I will defeat God for sure!"

The terrible king went up to heaven, once more. God sent mosquitoes to the terrible king. The terrible king just laughed at the mosquitoes. "Go and bring me the best carpet."

The king made another command. He thought that if he wrapped the carpet around his body the mosquitoes would not be able to bite him. But one mosquito went inside of the carpet. Because of that one mosquito, the terrible king was rolling around screaming. The terrible king that couldn't even catch one mosquito was a laughingstock for his troops.

Once upon a time in a kingdom far away, there were eleven Princes and a single Princess, by the name of Elisa. One day, their mother died of a disease.

Eventually the King married again. The new Queen hated the twelve children.
