

# 供水环泵 ZHONGHUAN

产品名称	供水环泵 ZHONGHUAN
公司名称	广东中环真空设备有限公司
价格	.00/个
规格参数	品牌:ZHONGHUAN 型号:2BC-Series 材质:铸铁
公司地址	广东省肇庆市厂排街一巷
联系电话	86-07582848078 13822628664

## 产品详情

品牌	ZHONGHUAN	型号	2BC-Series
材质	铸铁	驱动方式	电磁
用途	air pumping		

2bc水环式真空泵是我厂为解决旋片式真空泵不能带水抽气这一缺点新开发的一种真空泵，主要用于抽吸不含固体颗粒，不溶于水，并且无腐蚀作用的气体，可广泛用于真空过滤、真空蒸馏、真空浸渍、真空消毒、真空引水、真空脱气、真空传输等各种粗抽真空、抽气量大的工艺过程。

- 特点：1 ) 可带水抽气；可用于含有灰尘的气体和气水混合物的真空系统
- 2 ) 工作液用水；可用于清洁无油的真空系统。
- 3 ) 结构紧凑；泵与电动机直联。

2bc series water-ring vacuum pump is our factory ' s new product for solving the disadvantage that sliding vane rotary vacuum pump can not evacuate with water. it is suitable for roughing evacuating gases without rigid granules, gases free from corrosion, water-fast gases. it is used in technological processes such as vacuum filtration, vacuum distillation, vacuum-forming, vacuum impregnation, vacuum disinfection, vacuum diversion, vacuum degassing, vacuum transfer.

- characteristic: 1 ) pumping with water: it is used in the vacuum system with dust or with air-water mixture.
- 2 ) operating fluid: it can clean the vacuum system without oil.
- 3 ) compact form: the pump is connected directly with electric motor.
