

ZLE系列废油再生处理设备

产品名称	ZLE系列废油再生处理设备
公司名称	重庆市陆顺科技发展有限公司
价格	面议
规格参数	加工定制:是 品牌:- 工作介质:-
公司地址	重庆市沙坪坝区新桥村金竹沟88号
联系电话	86 023 65226600/65226037

产品详情

zle系列废油再生处理设备

zle used engine oil regeneration machine series

用途：

适用于内燃机油、真空泵油、液压油、压缩机油等润滑油、食用油的净化再生处理。能有效除去油中的水份、气体、杂质、胶质、沥青等，处理后废油的颜色和透明度被恢复。

特点

本机采用物理及化学方式，达到净化再生的目的。

配置气体净化装置，减少有害气体的排放。

先进的自动恒温控制系统、自动液位控制系统、自动压力保护系统以及精良的配置，保证设备高性能运行。

精过滤系统采用压滤机，杂质过滤面积大，操作维护方便。

加热采用间接加热方式，确保加热均匀，油温稳定。

配置真空分离系统对油品进行高纯度净化，脱除油中微水及残余气体。

配置相序、缺相保护，漏电保护。

use :

this kind of purifier is applicable to purification of various used black engine oil from transport facilities such as ship and automobile. this machine can remove the tiny impurities dispersed in oil such as carbon particles and deep oxides, as well as bad substance such as colloid and bitumen. thus, the clarity of oil is recovered and the color of used black engine oil is restored.

feature:

this machine adopts physical & chemical theory to get the refined and regenerated oil.

with the special waste gas collecting and absorbing device, this machine can stop most of the harmful gas going into the air and be friendly to the environment.

the fine filtering system use automatic press filter to remove impurities, which have big area to filter impurities and can be operated and maintained easily.

the advanced fully-automatic temperature controlling system, liquid-level controlling system, defoaming controlling system, pressure protecting system and excellent equipment can ensure operation of the machine with high performance.

indirect heating used by the heating system to ensure waste oil to be heated evenly and the temperature of waste oil to be stable.

the vacuum system is used for high-level removing the micro water and the left gas of the waste oil.

this machine also installed phase-sequence and open-phase protection and creepage-proof protection.

本产品的加工定制是是，品牌是-，工作介质是-，设计压力是-（ Mpa ），设计温度是-（ ），容积是-（ m3 ），外形尺寸是-（ mm ），重量是-（ kg ），传热面积是-（ m2 ），型号是ZLE，产品别名是无，产品用途是废油再生处理，售后服务是-，规格是ZLE+0001,ZLE+0002
