## 产品详情

新型环保阻燃剂 (阻燃粉)

适用于橡胶、塑料制品等阻燃领域,如矿用运输带、胶板、地毯、橡皮衬垫、pvc电线电缆料、电线电缆护套、建筑材料、电子等等,具有阻燃、消烟抗静电等特性。该阻燃剂不同于以往的含卤阻燃剂,无毒无害,不产生二次污染。在燃烧过程中不会产生刺激性卤化氢气体和黑烟,是一种环保型的阻燃剂。用于聚烯烃中加工方便,阻燃效果明显,不迁移。具体特点如下:

- 1、添加了该阻燃剂的阻燃聚烯烃产品密度小,约为1.0g/cm3左右,
- 2、与树脂相容性好,机械性能好,特别是冲击性能好;
- 3、耐候性和耐老化性能优异,有利于回收加工;
- 4、耐迁移性优,非常适合于室外产品使用;
- 5、抗静电,绝缘性强,特别适合用于电气/电子工业;

## 6、产品无毒环保,符合绿色环保要求;

### 英文版the english version

flame retardants suitable for flame retardant fields such as rubber, plastic products, such as mining conveyor belt, rubber sheet, carpet, rubber liner, pvc wire and cable materials, wire and cable sheath, building materials, electronics and so on, has the flame retarding and smoke suppression such as antistatic properties. the flame retardant is different from the past contain halogen flame retardant, non-toxic harmless, does not produce secondary pollution. in the combustion process does not produce irritating halolide gases and smoke, is a kind of environmentally friendly flame retardant. used in polyolefin processing is convenient, flame retardant effect is obvious, don't move. specific features below:

- 1, adding the flame retardant flame retardant polyolefin product density is small, about 1.0 g/cm3,
- 2, good compatibility with resin, mechanical performance is good, especially good impact resistance;
- 3, excellent weather resistance and aging resistance, is conducive to recycling processing;
