

PS 27 德国halstrup walcher 微差压变送器

产品名称	PS 27 德国halstrup walcher 微差压变送器
公司名称	上海广强自动化科技有限公司
价格	面议
规格参数	加工定制:是 品牌:德国halstrupwalcher 型号:PS27
公司地址	上海市金山区亭林镇松隐南星村3106号2楼406室
联系电话	13761055860 15121178688

产品详情

basic sensor for simple applications - mounting on top-hat rails.the ps 27 differential pressure transducer is a basic sensor for simple applications with very little hysteresis, temperature dependence or zero-point drift.in addition to differential pressure data, the ps 27 also records positive and negative overpressures, and is suitable for measuring air and all non-aggressive gases. zero-point calibration can be performed via an external control signal. a jumper is available for selecting the output signal.

a built-in adapter for top-hat rails allows the ps 27 to be mounted on top-hat rails (e.g. in a control cabinet) with no additional accessories required. with the optional switching output, a visual or audible alarm can be triggered whenever values fall above or below a threshold parameter. the ps 27 is a simple, precise pressure transducer for applications in areas such as air-conditioning and ventilation technology. protection class: ip 65.

basic sensor, very little hysteresis, contact points, suitable for mounting on top-hat rails, ip65 protection class.

technical data:high level of sensitivityhigh level of accuracy and long-term stabilitymeasuring ranges: ± 100 to ± 200 kpalinearity: 1,5 % v.e.very little zero-point drift: 0,1 % /kvery little hysteresis :0,1 % / koverload protection::4x for measurement ranges ≤ 30 kpa12x for measurement ranges ≤ 20 kpaoutput signals: 0 - 10 v, 0/4 - 20 masupply voltage:24 v ac/dc (no galvanic separation)15..32 vdc (two wire system)top-hat rail mountingmedium: air, all non-aggressive gases.further information available on request

本产品的加工定制是是，品牌是德国halstrupwalcher，型号是PS27，类型是微差压变送器，测量介质是空气，测量范围是 ± 100 to ± 200 （kPa），输出信号是4-20（mA），电源电压是15..32VDC（V），工作温度是10-60（ ）
