## 产品详情

accutools®bluvac数字真空计

accutools®bluvac数字真空计在美国制造生产，是一种先进的数字真空计利用专利技术提供市场上最高的精度和分辨率。

可连续使用300h，精度为0.1micron-1000microns

接口：1/4"

accutools® bluvac digital vacuum gauge the accutools® bluvac digital vacuum gauge is a state-of-the-art digital vacuum gauge utilizing patent-pending technology to deliver the highest accuracy and resolution on the market. proudly made in the usa

loaded with features the bluvac digital vacuum gauge is one of the most innovative products that trutech tools has seen or tested in a digital micron gauge! problems with oil contamination, field calibration, and work flow have all been addressed. at 0.1 micron resolution you can easily see if the vacuum pump is gaining ground, if the oil needs changed, and when the gauge is isolated the decay of the vacuum and the ultimate system pressure. because of the resolution of the bluvac, we highly recommend you use vacuum rated core tools and hoses. all hoses leak, and at .1 micron resolution that will be very apparent. operating for up to 300 hours on a single 9v alkaline battery, the bluvac sports a large 1/2" numeric display and a bright blue backlight. the bluvac measures from 0 to 25,000 microns with 0.1 micron resolution below 10,000 microns.

accurately measures vacuum down to 10 degrees f with lithium batteries making it ideal for refrigeration applications.

innovative oil sensor and self-diagnostics ensure accuracy. the bluvac is the only field-calibratable vacuum gauge that

requires no special equipment for calibration.
