

SIMCO TOPGUN除静电离子风枪(图)

产品名称	SIMCO TOPGUN除静电离子风枪(图)
公司名称	东莞市厚街安迪斯防静电设备厂
价格	面议
规格参数	品牌:SIMCO 型号:TOPGUN 输入电压:220 (V)
公司地址	中国 广东 东莞市 广东省东莞市厚街镇新塘工业区丽新路8栋
联系电话	86 0769 26056231/13798876196

产品详情

model top gun

operation/maintenance

section 1.introduction

gun which provides superior static elimination and

targeted particulate removal for a wide variety of

industrial applications.it satisfies the needs of strict

demand for micro-electronic industry.it is ideally used in

class 100 clean-room.it has an effective distance of 1000mm.it requires its high voltage transformer for operation,which is included.

if the top gun is used and maintained properly,it will give many years of excellent service.

section 2.features

a)quickly neutralizes static charges;

b)shocklessdesign;

- c) high voltage and air output of synchronous control;
- d) build-in ionization indicator light, air filter and air output regulator;
- e) with flexible cord for user comfort;
- f) with a light-touch trigger;

section 3. operation

either the top gun power supplies transform the regular electricity supply into an a.c. high voltage. this high voltage is directly coupled to the ionizing pin (electrode), whilst the outer nozzle of the air gun is connected to earth. a current flow from the pin to the earthed nozzle produces a cloud of positive and negative ions.

when the trigger is pressed, a stream of compressed air will pass through this cloud of ions, this air will become ionized and can then be used to neutralize static charges and remove contamination.

section 4. installation

air

always supply top gun with filtered, dry non-combustible gas, such as compressed shop air or nitrogen, if the air is not dry, damage to the equipment may result and the warranty will be voided, dirty air can

introduce moisture and oil, contamination the units' emitter assembly along with the materials to be cleaned or

neutram. filters must therefore be used at all times upstream on the air nozzle a water trap-type filter should

be used in conjunction with an oil coalescing-type filter.

failure to fit securely will prevent ionization and

may result in the pistol becoming live, which can cause operator shocks, whilst harmless this experience can be unpleasant.

本产品的品牌是SIMCO，型号是TOPGUN，输入电压是220（V），气压是78（PSI），消电时间是1.0（s），重量是4（kg），产品认证是CE
