# 英国Molyslip COPASLIP高温铜膏,金粉,格兰粉,高温油库存充足

产品名称	英国Molyslip COPASLIP高温铜膏,金粉,格兰粉,高温油库存充足
公司名称	深圳市福美来科技有限公司
价格	面议
规格参数	种类:船用系统油 品牌:MolyslipCOPASLIP 牌号:450566
公司地址	中国广东深圳宝安区 福永街道白石厦社区石龙头旧村十一巷9
联系电话	86 0755 13530416958 13530416958

# 产品详情

深圳市福美来科技有限公司,李小姐,电话:13530416958 qq:2920672149

高、低温(万能)抗粘着安装用化合剂高温铜膏、金粉、格兰粉、防卡剂

anti-seize compoundscopaslip(俗称"高温铜膏"或"金粉")能防止螺栓和螺母在高温或者恶劣的环境下(-40-1100)咬死和腐蚀。当将高温铜膏涂到物体表面时,它会形成平滑的矩阵而不硬化、固化或者融化,也不受收缩、膨胀或者振动的影响。在高度摩擦的部位内高温铜膏能减低磨损和扭力,因此保证快速安装和拆卸,甚至在极端的温度和压力下的表面,它也能自动适应细微不规则的金属表面,平滑它们从而防止磨损和留下伤痕。

copaslip高温铜膏原产地:英国,是国际知名品牌molyslip的一种万能防卡剂,广泛应用于全世界的各种工业行业上。

molyslip® anti-seize lead free copaslip

high and low temperature assembly compound. formulated to protect against seizure of metal parts, even under extreme conditions of pressure and temperature. available in 500g and 5kg quantities.

an anti-seize compound and a lubricant perform entirely different functions although many anti-seize products have lubricating properties, especially at higher temperatures. in environmentally adverse conditions such as high humidity and salinity, extreme pressure, acidic atmospheres or excessive temperatures, metals can fuse or weld together. the chief culprit is corrosion, particularly in marine surroundings. molyslip anti-seize products are designed to provide an insulating layer between metals so that dismantling and routine maintenance are free from breakage of fused parts. this problem is especially onerous on threads and shackles. a single application of copaslip (often misspelled as copperslip or coppaslip) or alumslip will stop metal fusion for many years.

#### copaslip®

copaslip® (often misspelled as copperslip or coppaslip) - the original anti-seize compound. it is a very high temperature (up to 1100 ° c) anti-seize assembly compound, bentone based non-melt grease with copper, polybutene, and anti-corrosion additives.

molyslip as 40/as 60 anti-scuff paste

anti-scuff, bedding-in paste, gelled lubricating oil with a high proportion of mos2. as60 contains 60% of mos2; as40 contains 40% of mos2 with graphite, rust and corrosion inhibitors.

adf

air drying film. pure molybdenum disulphide in an air drying bonding resinate for use where oils/greases cannot be used (ie dust contamination). ideal for pre-assembly treatment of parts to minimise dangers of seizure, galling or scuffing, available in aerosols or bulk liquid for use in suitable spray-guns.

#### alumslip

alumslip anti-seize assembly compound is specially formulated to protect against seizure even under extreme conditions of pressure and temperature. also a highly effective thread lubricant and protective. designed for same applications as copaslip® (often misspelled as copperslip or coppaslip) but where there is a prejudice against the presence of copper. temperature range up to 1100 ° c.

#### nickelslip

nickleslip is a nickel based extra high and low temperature anti-seize assembly compound. containing pure nickel, aluminium and graphite in a non-melt base with corrosion and oxidation inhibitors.

### 应用领域:

在汽车行业中:copaslip高温铜膏能防止刹车片与刹车盘之间尖锐的响声,在故障或者保养时可非常容易的拆卸底盘装置,缸头,进排气装置,中央连接部分,垫床以及车轮螺母。在全世界的制造厂中广泛应用。

在化工行业中:高温铜膏能使在日常循环维修保养工作中拆卸蒸器、锅盖、阀门和炉部件的时候,可节省大量的时间,以便取出螺纹、垫床和盘更来清洁,在高度摩擦部位减少磨损。

在石油工业中:在石油钻井、生产和精炼中使用高温铜膏能节省停工期,防止长期暴露于恶劣环境下工具的接头、钻盘、精密的螺纹、阀门和大的或者小直径的管系锈蚀咬死,能容易地拆卸。

在船舶工业中:在船上的环境下使用高温铜膏保护运动部件免于锈蚀,易于拆卸和安装螺母、螺栓、法 兰盘、吊机、起锚机、锅炉检查孔,总之在任何会引起金属腐蚀、咬死和阻碍日常循环维修保养工作 的地方都用得到高温铜膏。

在制造业中:使用高温铜膏为维护温度高至1100 的设备,应用于极端压力的部位以避免磨损,易于拆卸透平、给水泵、铸造机以及挤压机等设备的外壳上的柱头螺栓和熔炉上的螺栓,总之,无论哪里只要处于高温高压阻碍工厂或设备维修保养的地方都可用到高温铜膏。

在农业中:使用高温铜膏能确保拖拉机、耙、犁、割草机和农业机械易于无故障维修保养,防止不利和腐蚀的破坏,在发动机和机械维修保养中节省时间和金钱。

在汽车行业中: 可非常容易的! 世界的制造厂。

在化工行业中: 候,可节省大量 在石油工业中: 环境下工具的! 拆卸。

在船舶工业中: 螺栓、法兰盘、 循环维修保养 在制造业中:使

,易于拆卸透<sup>3</sup> 总之,无论哪§

在农业中:使用 止不利和腐蚀的

## 使用方法:

一、螺栓与螺母安装之前,用钢装上螺母,上紧。好处:1)粘性高温处理后,亦容易拆卸且不损干净,将copaslip高温铜膏涂刷上紧螺母。好处:1)增加密封性能往边缘上一撬,整片垫床即可完高温铜膏,可使阀门开关自如,

本产品的种类是船用系统油,品牌是MolyslipCOPASLIP,牌号是450566,总碱值(mgKOH/g)是1,粘度等级是SAE50,粘度(40)是1,粘度(100)是1,粘度指数是1,倾点是1,闪点是1,小品种油种类是其他品种,规格是500G
