

## 烧烤石 火山岩烧烤石

产品名称	烧烤石 火山岩烧烤石
公司名称	天津世纪科艺环保材料销售部
价格	1.00/件
规格参数	
公司地址	天津市河东区逸庭苑17-H
联系电话	86 022 24223421 15822863369

### 产品详情

火山石烧烤是一种正在全世界兴起的烧烤方法。火山石来自地壳深处，由于地壳深处的温度极高，火山石以火山岩浆的形态存在，随着火山喷发，岩浆也随之喷出地表，遇到水或低温开始凝结，凝结的过程由于空气的进入，逐渐变成固体的岩浆在内部形成了大量的气泡，完全凝固后就形成了构造独特的火山石。火山石烧烤以煤气或天然气作为燃料，利用火山石的优异的导热性、稳定性和极强的吸附能力，使食物在烧烤过程中受热均匀，效率大大提高。同时由于加热燃料是罐装煤气或天然气，完全不用担心食物被炭黑或炭燃烧后产生的灰烬所污染。

the lava bakes is one kind of world is emerging bakes the method. lava from the earth"s crust deep place, because the earth"s crust deep place"s temperature is extremely high, the lava by the volcano rock magma"s shape existence, along with the volcanic eruption, the rock magma also spouts the surface along with it, meets the water or the low temperature starts to congeal, because the congealment process air entry, turned solid the rock magma to form the massive air bubbles gradually in the interior, coagulated after completely, has formed the structure unique lava. the lava bakes by the coal gas or the natural gas takes the fuel, the use lava outstanding thermal conductivity, the stability and greatly strengthened adsorptive capacity, causes food to bake in the process to be heated evenly, the efficiency enhances greatly. simultaneously because the heating fuel is the canned coal gas or the natural gas, does not use worry food after completely by the carbon black or the coal combustion, produces the ashes pollute.
