

冷库门边发热线 硅胶发热丝 制冷发热线

产品名称	冷库门边发热线 硅胶发热丝 制冷发热线
公司名称	深圳市鑫鹏制冷设备有限公司
价格	95.00/个
规格参数	加工定制:是 品牌:永明 型号:6M-220V-100W
公司地址	深圳市龙岗区布吉街道上水花园155-7-502室
联系电话	13760322586

产品详情

本店所有发热线都是默认220v电压,需要不同电压或者功率,都可以定制,欢迎联系掌柜,谢谢!

本店配备现货：1m,2m,3m,4m,4.5m,5m,6m,7m,8m,9m,10m,11m,12m

可以根据客户要求定制各种长度、电压、功率。

排水化霜加热线基础参数：

线径：2.5mm 电压：220v 功率：每米17w

硅橡胶电加热线是在玻璃纤维芯上缠绕电阻合金作为发热体，并在其外层包覆软绝缘耐热硅橡胶材料的电加热线材。它的绝缘层具有优异的耐热性能，在150℃下可长久使用而几乎无性能变化，在200℃下可连续使用10000小时，适宜的长期使用温度为-60℃~180℃，功率密度一般不超过40w/m。被广泛用于家电、医疗保健、美容器材、机器设备、化工、塑料加工行业中。

the kind of product enlases resistance alloy wire around the glass fiber cable core with the soft insulated resisting heat silicon rubber material outside the glass fiber cable core .the insulation layer has excellent resisting heat performance,it can work without performance change under 150℃ and is able to work continuously for 10000 hours .the appropriate operating temperature is from -60℃ to 180℃ ,the power density does not exceed 40w/m.widely used in home appliances,medical treatment and health protection,cosmetology equipments,machine equipments,chemistry industry plastic process and so on.特点:

characteristics1.具有优异的耐热性能，在150℃下可长期使用而几乎无性能变化，在200℃下可持续使用10000小时。2.绝缘性优良，绝缘电阻大于500mΩ，在很宽的温度和频率范围内其阻值保持稳定，对高压电晕放电和电弧放电具有很好的抵抗性。3.具有阻燃性和自熄性，因硅橡胶不含有卤化物，燃烧时不冒烟或放出毒气，适用于各种防火严格的场合。4.具有良好的耐寒性和医疗上优良的合理化性。

1.excellent resisting heat performance,it can work almost without performance change under 150℃ and can work

continuously for 10000 hours.2.good electricity insulation performance,insulation resistance exceed, and possesses good 500m.the resistance value keeps steady,and possesses good repellence to high voltage discharge and electric arc discharge.3.the product can prevent burning and can extinguish by itself ,and as silicon rubber do not contain organic halid ,when burned,it will not smoke or exit poison gas and can be used where require strict fireproof.4.good endurance to resist coldness and excellent physical therapy performance.应用: 1、适用于家用电器各种中温场合,如冰箱、空调、饭煲、电热椅、电热衣架、毛巾被等。2、医疗保健:电热药垫、电热腰围,各种美容美发,如:热发卷、发烫、电热巾等。3、种植、养殖行业如:花房、苗圃、大蓬菜等保温、育雏孵化机等等。

1.it can work in household electric appliances in all kinds of middle temperature occasions,such as the defrosting and heater of the refrigerator,air-condition and compressor ,electric cooker heater,towel heater,electrothermal chair,electrothermal clothes rack,electrothermal hanging,electrothermal desk,etc.2.be used in medical treatment and health protection: galvanothermy foment ,electrothermal cushion,electr-othermal kummerbund,electrothermal babushka,electrothermal feet safeguard and so on.3.it can be made into all kinds of equipments and tools in the cosmetology ,for instance,the electrothermal curler, marcel and the electrothermal towel and so on.4.application in planting and stockbreeding ,for instance,heat reservation of greenhouses, nursery and greenhouse vegetable and brooder,etc.

性能参数:

1、常态绝缘电阻: 100m 2、耐压:1500v/1min3、泄漏电流:0.05ma/m

1.normal insulation resistance: 100m 2.allowable voltage:1500v/1min3.leakcurrent:0.05ma/m

本产品的加工定制是是,品牌是永明,型号是6M-220V-100W,材质是硅胶,常温电阻是460-509() ,直径是2.5(mm),主要用途是防止冷库门结冰,长度是600(mm),功率是100(w),类型是硅橡胶电热带,表面温度是60,最大电压是230
