

快速CMOS缓冲器/时钟驱动器

产品名称	快速CMOS缓冲器/时钟驱动器
公司名称	深圳市德衡睿电子有限公司
价格	20.00/个
规格参数	类型:时钟计时IC 品牌:IDT 型号:IDT49FCT805SOGI
公司地址	深圳市龙华区大浪街道高峰社区龙胜路大城时代大厦513
联系电话	15889627895 13652369286

产品详情

49fct805

fast cmos buffer/clock driver

the 49fct805 is a non-inverting buffer/clock driver built using advanced dual metal cmos technology. each bank consists of two banks of drivers. each bank drives five output buffers from a standard ttl compatible input. these devices feature a “ heart-beat ” monitor for diagnostics and pll driving. themon output is identical to all other outputs and complies with the output specifications in this document. the 49fct805 offers low capacitance inputs and hysteresis. rail-to-rail output swing improves noise margin and allows easy interface with cmos inputs.

features

0.5 micron cmos technology guaranteed low skew < 700ps (max.) low duty cycle distortion <

1ns (max.) low cmos power level ttl compatible inputs and outputs rail-to-rail output voltage swing high

drive: -24ma ioh, +64ma ioltwo independent output banks with 3-state control 1:5 fanout

per bank “ heartbeat ” monitor output available in ssop and soic packages
