

deposition physical coatings

产品名称	deposition physical coatings
公司名称	湘潭市宏锋机械设备制造厂
价格	200000.00/个
规格参数	加工定制:是 品牌:HongfengVAC 型号:ARC-1000
公司地址	湘潭九华经开区伏林东路6号
联系电话	86 0731 58282058 13707325222

产品详情

physical vapor deposition coatings system

advantages:advantages of this machine(vacuum pvd coater):1) simple visual interface for the operator, process control system runs on windows system interface and easy to use2) vacuum pump system efficiency, which increases productivity due to shorter batch times3) high performance layer monitoring system is equipped for enhanced production result4) automated work cycle, which requires less workers per shift and training time, low production cost5) repeatable and reliable coating6) safer and environmentally-friendly process guarantee7) highest yieldcoating properties: • excellent layer properties • longer lifetime • smooth surface • many bright, metallic colours, decorative or functional • excellent scratch protectionpvd applications:

you may also interested in the pvd coating machine for the following applications(direct link):	
pvd coater for glass	aluminum or silver mirror making
	ito conductive glass
	low-e glass coating
	solar tubes coating
pvd coater for plastic	plastic metallizing
	headlamp metallizing
	christmas balls metallizing
	shoe heel metallizing
	food grade coatings for plastic cutleries
pvd coater for metal	tools or hardwares coating
	stainless steel sheets with tin coatings
	jewelry
pvd coater for ceramic	ceramic tiles coating
	mosaic coating

our services: before sales: 1. our engineers are ready to provide custom made design and recommendation for each customer's case. 2. we provide professional consulting service for pvd coaters and lines. 3. we also have set up good relations with the suppliers of relative consumables and parts for your needs. after-sales: 1. we will send the engineers to your place for installation, fine tune and for operation training. 2. we will provide troubleshooting service all lifetime. 3. the warranty period of the machine is 1 year. 4. we will contact you to ask for about the conditions of the machine in periodically. 5. we also provide the service for further extension on your existing machine. faq: question 1: are you manufacturer? answer: yes, we are. welcome to visit our factory! question 2: what is price of the machine? answer: the machine is custom made. if you have any drawing or any information on specification of the machine, please send to us for quote. if you are totally new in this area, please tell us the max. dimension of your products, its application, and your desired capacity. we will provide our professional suggestions and work out an appropriate design for your project. question 3: what do i have to do for my products before processing by the vacuum coater? answer: in vacuum area, the products (we call it "substrate") have to be clean, dry and smooth. so we will need washer and dryer, sometimes base varnish, and topcoat to protect the coatings. question 4: do i have to pay the costs for pollution? answer: the machine is environment-friendly, there is no liquid chemical waste and harmful gas. this is a kind of green technology. inquiry guides: dear customer: :-) good day. when you are going to send us a inquiry, in order to design the most appropriate machine for your project, please answer the following questions in your letter: 1. what is your product, its material and application? 2. what is the possible max. dimension of your product? 3. what is your desired productivity per 8 hours/shift. the answers to the above question will help us a lot on designing or do the recommendation.

本产品的加工定制是是，品牌是HongfengVAC，型号是ARC-1000，适用范围是VacuumCoating，产品别名是physicalvapordepositioncoatingssystem，电镀电源是直流电源，电镀位置是轮镀，镀种是真空镀膜，镀膜材质是氮化钛膜，镀膜原理是离子镀
