

X-POWER magnetic fuel saver节油器

产品名称	X-POWER magnetic fuel saver节油器
公司名称	平阳县福光塑料制品厂
价格	7.00/个
规格参数	加工定制:是 节油设备类型:汽车节油器
公司地址	平阳县万全镇叶垵村
联系电话	13806803336

产品详情

汽车节油器 2pcs

产品型号：xp-2

汽车磁化节油器原理是应用高能量恒定磁场，燃油以一定的压力及流速切割磁力线，使其分子团变小并重新排列，粘度降低，活性增强，喷射后弥散性更大，雾化效果好，令燃烧更完全，爆炸能量更大，废气减少，此技术无需添加任何能源及化学剂，发动机无需任何技术改造，在正常使用下产生超常动力，且减少有害气体。

the best fuel saver what is turbomag-magnetic fuel saver? turbomag-magnetic fuel saver increase combustion efficiency for a cleaner burning engine. this reduces harmful emissions while increasing engine performance. enjoy these benefits: 1) save fuel, save money, more miles per gallon 2) it can save 10%-25% fuel 3) 50% reduction of carbon monoxide and hydrocarbons 4) helps pass emission testing 5) high octane performance with lower octane fuel 6) turbomag will improve engine performance- quicker starts 7) stops scale build-up and corrosion in engine 8) reduced wear on o2 sensor and catalytic converter

product description

this set of magnetic fuel treatment system improves your gas mileage, as seen on tv ads. they are very easy to apply. two pieces of neodymium bar magnets are encased inside two plastic holders respectively with n-s poles facing each other which attract two pieces together. use the strap to bind the two pieces tightly to the fuel line. choose the spot which is about 2 inches from the engine to apply this unit. similar products are being sold for \$69.99 each from on-line automotive supply centers. *improves gas mileage up to 24%-you can save hundreds of dollars a year on fuel costs! *you'll see increased horse power output, a better and faster ignition and reduced carbon monoxide emission. *works

on all engines and fuels-uses strong magnets for diesels, high-performance, larger and commercial engines easy to install-maintenance free! *place over the incoming fuel line (gas or diesel) in your car, truck, boat or motorcycle and start maximizing your engine's performance.

*breaks up fuel molecule clusters into smaller, more combustible fragments. *will dramatically reduce engine maintenance costs by eliminating carbon and varnish deposits, the main source of engine wear. *this is the most effective fuel-enhancing device available. *does not affect vehicle manufacturer's warranty. it can also be used for water treatment purpose.

本产品的加工定制是是，节油设备类型是汽车节油器
