SED隔膜阀

SED无菌隔膜阀：

SED二路隔膜阀2/2 Way Diaphragm Valves Manually or pneumatically operated

SED隔膜阀组：Through flow valve vertical (SL/GMP) or horizontal (SA/SAP) mounted

SED多路隔膜阀：The application is predominantly for cleaning, supplying, sampling, allocating, alloying, deflecting and cleaning (SIP/CIP)

SED油罐隔膜阀：

Tank body machined from a solid bar stock material Material 1.4435/316L ASME/ BPE Other alloy options available as specified Minimized dead leg and internal sump Suitable for mounting with SED Steripur Series and KMA Series Actuation Optional manual operation via an extended crankshaft stem

SED金属隔膜阀：Comprehensive material combinations allow for all-purpose applications; wide range of nominal diameters DN 10 - 300;good temperature resistance

SED塑料隔膜阀：Noncorrosive, beneficent price-performance ration, lower maintenance costs, easy fitting

SED座阀：SED角座阀,SED球形座阀

Seat valves are used in the chemical process industry, in parts of the pharmaceutical industry, in biotechnology, and in food and beverage. These valves are suited for shutting off and regulating liquid and gaseous media. Moreover, seat valves can be used with steam and technical media, such as CIP-liquids etc.

SED电磁阀：SED导向电磁阀，SED岛阀

The control of pneumatic process actuators is an important component of process automation. In this sector, SED offers a complete portfolio。

SED定位器

SED阀门定位器: SED 24V 定位器，SED 双绕线组定位器，

precise controlling is an important component of process automation. In this area, SED offers digital positioners in different designs: direct mounting, compact design, external controlling, and operation in explosive proof areas (zone 1), to name only a few features.

SED流量计：SED Type 785/786，SED Type 790/791

The position of the top of the float against the scale on the tube shows the flow rate level. In addition to the visual readout, this flowmeter fits with minimum and maximum limit switches, or with a transmitter.
